COLOAIRE
CONTAINMENT SOLUTIONS

Sliding Containment Panel

FEATURES:

- **Full length handles inside and outside of panels**
- **Easy slide panels**

Panel Summary

The Hot Aisle Containment Sliding Panel System enhances airflow in data centers with a durable aluminum frame and twin-wall polycarbonate panels. It contains hot air, reduces recirculation, and boosts cooling efficiency.

Sliding panels allow easy, space-saving access for maintenance without compromising airflow. The system is scalable and reconfigurable for evolving environments.
